Nguyen Phuong Linh
(Vietnam)

I first arrived in Japan in 2022 and started my new student life as a MEXT-scholarship student. For me, studying at Ritsumeikan University for MPED was the best decision I have ever made. Ritsumeikan supports and nurtures me, increasing my knowledge about economics. I also had opportunities to experience Japanese culture such as the field trip to various companies, or cherry blossom picnic, Gion festival, with our professor and classmates. I have had many unforgettable memories here. I would like to extend my gratitude to Ritsumeikan University and all of my fellow students there. I look forward to seeing all of you soon.

Asel Israilova
(Kyrgyzstan)

My two years of MPED at Ritsumeikan University was the best academic and cultural experience in my life. With the excellence and support of academic staff I had a great opportunity to deepen my knowledge in economics and conduct independent economic research. I also had a chance to enjoy the Japanese lifestyle and richness of the country, culture and nature. I met a lot of charming people and have many unforgettable memories. I will keep these memories for a long time.

Alumni's Voice

Yudhistira Nurpatra
(Indonesia)

I believe that studying in the MPED program at Ritsumeikan University is very beneficial for my future. Guided by world-class professors, I gain valuable knowledge in empirical research and economic theory, which is useful for my career as a policymaker. Outside of university life, I am also blessed with other invaluable opportunities to exchange cultures with Japanese people and to study Japan's governance in daily life.

Nwe New
(Myanmar)

Studying at Ritsumeikan University gave me the advantage of studying in one of the world's largest economies while also receiving high quality guidance from numerous teachers with years of experience in the important East Asian economies of Korea and China.
