

Sub-program (Target Priority Area)	2. Environment-friendly and Balanced Economic Development
Component (CP) (Development Issues)	2-1. Strengthening Domestic Industry and Diversifying Export Products
Expected Research Areas	<ul style="list-style-type: none"> - Industrial Policy - Agriculture Plan - ICT · Digital Industry Promotion - Export Promotion - Tourism Promotion - Business Administration - Urban Development Project Management - Geodesy Data Analysis - Waste Water Treatment Plan and Management - Logistics Management System
Accepting University	<p>Hiroshima University (Acceptable number of seats: 2) GS of Humanities and Social Sciences Division of Humanities and Social Sciences, International Economic Development Program -Master of Economics - Master of Business Administration - Master of International Cooperation Studies - Master of Philosophy</p> <p>GS of Innovation and Practice for Smart Society Smart Mobility, Smart Energy, Smart Agriculture, Global Health and Medical Science, Social Innovation Science - Master of Philosophy</p> <p>Rikkyo University (Acceptable number of seats: 2) GS of Business Master of Public Management and Administration (MPMA) Course -Master of Public Management and Administration</p>
Background and Needs	<p>Driven by its abundant natural resources, Mongolia has continued to achieve economic growth. On the other hand, the country's fragile industrial structure, which is excessively dependent on the mining industry, has made sustainable economic growth hampered by external factors such as resource prices. In addition, the mining industry has low employment absorption capacity, and apart from a few industries such as cashmere, and industries with employment absorption capacity are underdeveloped. In light of this situation, Mongolia is calling for the need to diversify its industries, create jobs, and develop human resources in order to achieve sustainable economic growth that does not rely on mining. Mongolia's long-term development goal, "Vision 2050," also calls for the diversification of the country's economic structure and the development of diverse industries other than mining. In order to realize this goal, there is a need to develop administrative officials who are well versed in industrial policy and SME promotion from a long-term perspective.</p> <p>The Government of Japan has set "Creating eco-friendly and balanced economic growth" as a priority area in its Country Development Cooperation Policy for Mongolia, and this area constitutes a part of it. Japan has been promoting agropastoral development, comprehensive regional development, fostering human resources in engineering, improving access to finance for small and medium-sized enterprises, and promoting business exchange through the Japan Center and other programs.</p>
